

Dear Patient

Important Product Update*Important Product Update*Important Product Update

You have previously been taking Peptamen® in a 375ml can, as prescribed for you by your healthcare professional. Peptamen® 375ml can will be phased out from 1st May 2010 and this leaflet informs you about other presentations of Peptamen® which are available instead.

What presentations of Peptamen® will be available after 1st May 2010?

Peptamen® is already available in the following presentations, which will continue to be available after May 2010 (all of which can be used instead of the 375ml can):

200ml Vanilla Cup
4 x 200ml

500ml DRIPAC®-flex

1,000ml DRIPAC®-flex

Is the nutritional composition the same for all presentations of Peptamen®?

Peptamen® 500ml and Peptamen® 1,000ml have exactly the same nutritional composition as Peptamen® in a 375ml can.

Peptamen® Vanilla Cups have a very similar nutritional profile, slightly adjusted to make the product more palatable for drinking.

Will the way I receive my product change?

No, your healthcare professional has been informed of the changes and you will continue to receive your product in the same way.

If you have any questions on the Peptamen® range of products, please contact Nestlé HealthCare Nutrition Customer Careline on 020 8667 5130
